Full-Stack Developer (MERN) | AI/ML & Data Analytics | Building Scalable, Impact-Driven Digital Solutions

SUMMARY

Developer skilled in full-stack development (MERN), backend systems, and data-driven application design. Experienced in building scalable applications, designing RESTful APIs, and working with databases using SQL and MongoDB. Strong foundation in Python and JavaScript, with exposure to AI/ML concepts and real-world development workflows through a DRDO-CFEES internship. Focused on building robust and scalable digital systems.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Flask

Databases & BaaS: MongoDB, MySQL, Firebase Firestore, Supabase

Frontend & UI: HTML, CSS, Framer, Tailwind CSS (or any CSS libraries you've used—keep 1–2 max)

Core Concepts: Full-Stack Development (MERN), RESTful API Development, Backend Systems, Database Design, Data Analysis

Tools & Technologies: Git, GitHub

PROJECTS

PrepWise – AI-Powered Interview Preparation Platform

Tech Stack: React.js, Node.js, Express.js, Firebase Firestore

- Developed a full-stack platform with structured interview workflows, dynamic question delivery, and modular frontend architecture using React.
- Designed RESTful APIs and backend systems for managing question banks, user sessions, and categorized data (role, topic, difficulty), with AI-based content expansion

FinBuddy – Personal Expense Tracking System

Tech Stack: MERN Stack, Firebase Firestore

- Built a full-stack expense tracking system with categorized transaction management and a responsive dashboard for financial insights.
- Developed backend APIs and structured database design for efficient storage, retrieval, and scalability of user-specific financial data.

Social Lens – Data & Content Analysis Platform

Tech Stack: Python

- Developed a Python-based application for processing and analyzing structured/unstructured data to generate actionable insights.
- Implemented backend workflows using Flask and designed data pipelines for efficient extraction, organization, and interpretation of data.

Additional projects available on [GitHub](#)

EXPERIENCE

Intern – DRDO (CFEES) (Jun 2025 – Aug 2025)

- Developed a web-based Inter-Department Circular Distribution System to streamline internal communication and document flow.
- Worked on backend logic and system design within a secure R&D environment, gaining exposure to real-world development workflows and AI/ML applications.

EDUCATION

JAGANNATH INTERNATIONAL MANAGEMENT SCHOOL, VASANT KUNJ

Bachelor of Computer Application (BCA) (2023-Present)

BAL BHARATI PUBLIC SCHOOL, GRH MARG

Senior Secondary (XII), CBSE (2023)

Secondary (X), CBSE (2021)

ACHIEVEMENTS & LEADERSHIP

- Led multiple hackathon teams to design and develop problem-oriented digital solutions, demonstrating leadership, collaboration, and rapid prototyping skills.
- Served as Manager at ENIGMA JIMS, organizing and coordinating technical events including Tech Lens and contributing to IT Fest CYNET 2025.
- Volunteered with NSS, participating in community initiatives including health camps and social outreach programs impacting 100+ individuals.
- Contributed to Unnat Bharat Abhiyan (UBA), conducting field surveys and data collection to support rural research and awareness campaigns.
